Joshua Thomson
Project Manager
(360) 620-9938

WHAT’S HAPPENING THIS MONTH:
Mass excavation and ground improvements have been completed for the main floor elevation. This month we will begin placing concrete for the exterior footings, with pours taking place twice a week. This is a critical step in the building process and will set the foundation for the structure.

After the footings are complete, we will start working on the foundation walls. This involves constructing the necessary support structures to hold back soil and create a level building surface. Please remain cautious around the construction areas and follow any posted detour signs.

Please track the progress of the construction with us, you can view the project's progression via site cameras at https://buildings.wsu.edu/

Construction is expected to be complete in Spring 2026
SCHWEITZER ENGINEERING HALL UTILITY WORK IN THE STREET

Spokane Street is closed for Utility Work
We are wrapping up the underground utility work from Spokane St. to Columbia St. Part of the Schweitzer Engineering Hall project includes local infrastructure improvements to the electrical, stormwater and sewer networks in this part of campus. Traffic and Buses will be routed around this closure by detour signage. We thank you for your patience and cooperation as we improve the campus infrastructure.

Other Construction Activities Occurring This Month:
- Continuing Footing Excavation.
- Pouring Concrete for Building Footings.
- Foundation Wall Construction.
